

WHAT IS DIGITAL SKILLS WALLET?

DIGITAL SKILLS WALLET is an EU-funded project dedicated to enhancing digital competencies across Europe. The project is developing an eco-system supported by a **digital platform** for the Acquisition and Assessment of the Digital Competence with the use of micro-credentials on the 5 digital competence areas as per the DigComp framework.

WHERE ARE WE NOW?

Just over a year since its inception, the project has made significant progress. Currently, the consortium is working on Work Package 2 (Microcredentials for the 5 Digital Competence Areas).

This phase of the project, led by the International Telematic University UNINETTUNO, involves developing Micro-Credentials for the 5 digital competence areas. In accordance with the European Union's recommendations to member States, these are organized across 8 levels of digital proficiency.

The DSW consortium has successfully completed the development of all the Learning Outcomes and Micro-Credentials. All partners are now finalising the translations into their languages (Italian, Romanian, Greek, Cypriot).

NEXT STEPS

After the finalisation of the translations, the next step will be to initiate Work Package 3 ("DigitalSkillsWallet Platform"). Under the guidance of the technical partner OMEGATECH, the consortium will work on designing and developing the "DigitalSkillsWallet" platform. The platform will serve as a central hub for individuals to access, evaluate, and showcase their digital skills, aligning with the project's overarching goal of empowering individuals in the digital era.

PROJECT MEETING IN ATHENS (2-3 APRIL 2024) PARTNERS

From April 3rd to 4th, the consortium partners gathered in Athens, hosted at Dimitra's offices, for the third Transnational Project Meeting.

Discussions during the meeting focused on the project's future direction and strategies to ensure its success, with particular attention given to the implementation of the online platform.

The primary aim of the project is to enable individuals to gradually acquire, evaluate, and showcase their digital skills.
